

# The Leaking Truth

## 2nd Post - Nand Mulchandani CIA IT E-Mail

February 20, 2024

Hi Nand,

The CIA and I have been in contact for some time, there happens to be a big FOIA case with my name on it that is full of lies and BS that never happened, I am a good citizen and exposing this FOIA in the matter of PUBLIC INTEREST would shed some light onto how far someone is going to taint my good name and IT should be able to uncover who/when edits we're made and possibly even the IP address's used to access. I have HIGH suspicion that 2016-2020 that file was highly under attack with countless updates made to it by the President Donald John Trump, the chatter I heard from the interns just making fun of me probably had access as well somehow in the "situation room" \*seriously the situation room??!!\* I have done everything I can think of to bring this FOIA into the light because it's probably been done to someone else before and that CONCERNS me DEEPLY especially thinking about the bigger picture going on here. IT seems to be the best department to handle this case at this point in time, hands down because you have access to all the logs and edits and any snapshots/backups/timelines because it's your IT infrastructure and I am sure you are passionate about that role and take it very seriously, I would! But I am on the other end of this situation so all I can do is do my best here and let the wise words I was raised with "The Truth Always Comes Out" happen here, this FOIA is PUBLIC INTEREST and seriously very concerning on multiple points especially the logs, I know you guys probably have the tools to keep tabs secretly on projects like this, I would recommend using those tools in this situation. Document everything, leave nothing to chance, that's what I would do if somehow roles were reversed and seriously if you were in my shoes you might be doing the same thing I am right now and doing my best to uncover the actual truth and see the bigger picture going on here, there's no time to waste, literally... Have an IT buddy with you to witness everything you do, like I said don't leave anything to chance. Whoever is messing with me and the systems I know they like using JavaScript, just lookup CNN Trump Tax returns and watch the JavaScript write on the fly \*literally\* compared to the paper forms congress got, 2016 page 130-140 there's an investment into a biotech company in

Bothell Washington in Canyon Park, that's a little close to home for me and makes me wonder, WHY?! I called them already so ask any buddy in IT at the NSA if they have the recording, I'm sure someone in their IT is possibly on my side here and believes in the TRUTH rather than the LIES. And NO that company did NOT call me back.. you can talk to the garbage guys in Snohomish county waste management, they can tell you about the airtag incident, kinda funny really, but it was meant to try and prove my point in tracing where did actually go!? I know this is stretch trying to reach out like this but it seems I have no other choice but to do everything in my power that I can to find the TRUTH going on here and expose that for what is! Possibly someday this might be looked at and we all might laugh about it, SOMEDAY but not right now, there's a much larger picture to reveal here and that's what I am after, I am determined and I have nothing to hide here, trust me. BTW I BCC the FBI just a heads up, but I'm sure you already could figure that one out :=) Please do the right thing here, it's so easy to tell the truth rather than a lie/s, and seriously if you see something say something, TSA motto but IT style lolz.. My contact info is readily available with the CIA. Thank you! I really appreciate any concern put into this matter, for the truth always comes out. Keenan Storbeck

## 2nd E-Mail to Nand

Idea, how about you read only the file and lock everyone out to just read only and setup a password only IT can figure out, windows allows 2048 characters at least so input your own password into that using prime numbers or some counting scale to hide your password from cracking. Then log all the edits happening to the file in real time and this will expose the fraud happening HERE PLUS you can log who did the edits in real time and monitor whose trying to get into the read only file?!? Food for thought to expose the truth going on here, I would share this info with your other IT buddies so together the truth can be exposed and the bigger picture painted here, it could expose the network of users and what they are trying to do, but the read only file they have to just sit with it and say "damn" lol Simple solution to a very complex situation. Your welcome Keenan Storbeck

## 3d E-Mail to Nand (paraphrased)

Hi Nand,

About my FOIA request, I know you don't wanna talk to me because you're one of the 'bad guys' here, well have I got the IDEA of the WORLD for YOU! How about you take my FOIA, duplicate the file and make one read only and the other a variable document

but do some fancy CIA software BS and take images of the ASSHOLE writing their own confession! Or capture something of intel to identify whole the real person is, IMEI, SIM Card, MAC Address, etc, etc.. That way legally speaking you can't say I didn't try to give you a good idea to prove my innocence here with this FOIA! So Nand be the champ here, help me out a little bit by being one of the good guys in this situation, you'll thank me later!

So that's the just of the email in a nutshell, but that's basically what I wrote. So I'm posting it here as well so it's legally captured the idea was planted as a seed and if that seed blossoms into the data we actually are looking for, then we have done our job properly.
